Important dates

Abstract submission : 10th March – **19th November 2018**

Early bird registration deadline : 7th January 2019

Venue

City Centre Vieux-Port, Marseille, France

The previous International Conferences on Swimming Pool and Spa showed the great interest in health and, air and water quality subjects related to microbiological and chemical risks, regulation guidelines, monitoring and management.

The first of these biennial conferences was held in Budapest in 2005, followed by Munich in 2007, London in 2009, Porto in 2011, Roma in 2013, Amsterdam in 2015 and Kos in 2017.

We are now planning the Eighth International Conference Swimming Pool and Spa, to be held in Marseille, France, in 2019.

This conference will bring together academics, doctors, sport facilities managers, policy makers, equipment manufacturers, engineers and other professionals, who make research, design, management, regulations and operate and control pools and spa. It is expected that research in occupational health will have an important role in the conference.

CONFERENCE TOPICS

- Microbiological health
- Disinfection by-products
- Removal of contaminants (in air and water)
- Modelling and simulation
- Pool design and management
- On-line and off-line measurement of air and water quality
- Guidelines and regulations
- Health benefits of swimming
- Education/behaviour
- Safety and emerging topics
- Biological swimming pools/ponds
- Thermal and seawater pools/therapeutic pools
- Private whirlpools, water playgrounds, water-theme park

Publication: Participants to the *8th international Conference on Swimming Pool & Spa* will be invited to submit manuscripts based on their conference presentations for possible publication in *Environment International* (IF_{2017 JCR} = 7.320).
